A separate report for Stepping Stones and CYU
Weekly topic by topic and monthly unit by unit
edgeXL
Easy alphabetical lists of scores from either Edge XL or course work.
Report by topic

Q13 - Do you have any other ideas for feedback regarding reports and data in Math Nation?

Do you have any other ideas for feedback regarding reports and data in Math Nation?

No

n/a

None

No

I value the date/time-stamp on Test Yourself Reports. Is that feature available on Stepping Stones and Check Your Understanding reports? Thank you!!!

No

It was much more user friendly in previous years, any way to bring back the original reports format?

The size of your screen for the amount of students I am able to read scores only supports 11 students. It has to be able to hold 35 to allow differentiation of teacher class sizes and reduce the amount of times having to select the next 11 students for the screen.

No

Put report in alpha by last name

not at this time

No

All data should be able to view for each class alphabetically. We should not have to hover over initials at the top of an assignment to record scores from work done on Math Nation.

I may not know how but you cant pull a report for a specific topic. I have to download and the modify the excel sheet to remove the other topics make it work.

No but can we please bring back the Wall?? And please train teachers on how to use it now, I find it so much more confusing and I'm really struggling to use it at all
